INTERNSHIP ANALYSIS REPORT

Name: Reinz Justine G. Dagang	**Date: May 2, 2026**
Internship Site: DevOps	
1. Setting	
The internship was conducted fully online, offering a flexible and convenient working setup. This arrangement suited me well because it allowed me to effectively manage both my internship responsibilities and academic requirements without difficulty.	
2. Site Supervisor	
Our supervisor provided guidance not only on the internal workflows of the company but also shared meaningful insights into the essential aspects of a real-world professional environment. This helped us better understand the expectations, responsibilities, and practices that are important in an actual workplace setting.	
3. Environmental conditions or events…	
I felt comfortable working from home while completing my OJT tasks, as the setup allowed me to stay productive and manage my responsibilities efficiently. In addition, the webinars conducted by the company helped us interns actively engage with our colleagues and foster a sense of connection with the team despite the remote setup.	
4. Self-Assessment	
I learned how to effectively multitask by balancing my responsibilities for both my thesis paper requirements and this internship. Despite the challenges, I was able to manage my time efficiently and consistently deliver quality outputs in both areas, which helped me stay organized and meet deadlines for submission and bookbinding.	
5. General	
This internship contributed significantly to my personal and professional growth. It helped me develop important lifelong skills such as effective communication, teamwork, and leadership, which I can apply in both my future career and personal development.	

Note: ***This analysis need not to be shared with the site supervisor.***
